

River Acres Water Main Extension

Project Update

6/4/20

Project recap 6/1 to 6/5

- Water main installation on Ideal Ave S has been completed
- Aggregate base has been placed in the southbound lane. This is the permanent rock base that will support the future asphalt surfacing
- Temporary traffic signals are regulating traffic where it is reduced to one lane when adjacent to the construction area
 - Vehicle traffic should utilize both lanes of Ideal Ave S when not in work zone
 - Please reduce speeds when driving through construction area

Proposed Work Schedule for 6/8 to 6/12

- The contractor will install services from the water main to the property line for those properties requesting services on Ideal Ave S
- The remaining asphalt surface on the north bound lane on Ideal Ave S will be removed. The contractor will then prepare the rock surface to pave the asphalt road in that area
- Traffic will continue to travel through the Ideal Ave S area during street construction
- Residents on 113th St S both east and west of Ideal Ave S with signed agreements with the City will have water service lines installed from the street to inside the house.
 - The well will NOT be disconnected at this time. The service lines will NOT be connected to City water or the interior plumbing. The service lines are being installed in advance in preparation of the future connection. Wells will remain in use until a scheduled connection is completed
- Please contact Brad Swanson with SEH Engineering with any project related questions
 - Email: riveracreswm@sehinc.com
 - Phone: 651-424-0666

If you would like the water service installed within your property to your home, please submit your signed water service agreement to the City.
